

# Law Enforcement Officers Should Be Seen and Not Hit.

Protect your officers with the most important piece of Personal Protection Equipment since body armor.

Of all the risks law enforcement officers face, the most common is being hit by a vehicle while out of their squad car. This is especially true at night and/or during inclement weather.

Thanks to a new self illuminating technology, Safe Lites safety vests can dramatically reduce the risk of your officers being injured, disabled or even killed by a motorist who did not see them.

Safe Lite vests actually light up under their own power, with a 2.1 oz. rechargeable power pack for 8-10 hours on a single charge. It recharges via DC or AC in just three hours.

Field tested for over two years by police officers and state troopers, this vest is available right now to start protecting your officers. It makes your officers visible from well over 500 feet, at all angles, and in all lighting conditions.

Provide your officers with the best protection available today.

**For more information call us toll free at 866-206-0566,  
or stop by booth #343 at the IACP Conference.**

Grant programs are available to assist you with the purchase of this equipment. Please contact us for details.
